Crizal Sapphire™ lenses with Scotchgard™ Protector
The Clearest No-Glare Lenses Ever Created.

- 50% less reflection than the best No-Glare lens on the market today for enhanced visual comfort and greater aesthetic appeal
- Maximum light transmission for the ultimate clarity of vision
- Best scratch resistance means more durability and no visual distractions
- Best cleanliness so fingerprints, water and smudges easily wipe away
- Best dust repellence so your lenses stay cleaner longer

The Visual Reflection Comparison Test measures the amount of glare reflected in normal light conditions.

With less than 0.5% reflectance, Crizal Sapphire™ lenses with Scotchgard™ Protector far outperform the competition in No-Glare performance so your patients can enjoy ultimate clarity of vision.

Visual Comfort and Safety

Glare and reflections are reduced for improved visual comfort and safer nighttime driving.

New Crizal Sapphire lenses with Scotchgard Protector eliminate all 5 enemies of clear vision better than any other No-Glare lens on the market today for the ultimate clarity of vision!

Aesthetic Appeal

Glare doesn't reflect off lenses so they appear virtually invisible.

98% of No-Glare wearers will purchase a No-Glare lens for comfortable vision and aesthetics. Now offer your patients the most glare-free lens ever created.*

Crizal Sapphire with Scotchgard Protector is not just another product advancement. It is a total lens redesign that creates a No-Glare lens with 98% less reflection than even the best No-Glare lenses on the market!†

The foundation of the ELT System is a unique light interference cancelling layer which works in combination with Crizal Advança™ with Scotchgard Protector. This advanced technology raises the scratch resistance of Crizal Sapphire with Scotchgard Protector to a level unmatched by any competitor.

The Most Significant Innovation in No-Glare Technology

Essilor’s exclusive Enhanced Light Transmission™ (ELT) System is a unique technology which maximizes light transmission through the lens by even further reducing glare.

Unmatched Scratch Resistance and Durability

Crizal Sapphire™ lenses with Crizal® Protector feature the revolutionary SR Booster™ layer of Crizal Advança™ with Scotchgard Protector. This advanced technology raises the scratch resistance of Crizal Sapphire with Scotchgard Protector to a level unmatched by any competitor.

Glass Class Scratch Resistance

The Bayer Abrasion Test is a measurement of scratch resistance. Crizal Sapphire with Scotchgard Protector features glass class scratch resistance.

Unparalleled Durability

With the Real Life Simulation Test, lenses undergo 5 different tests that simulate everyday wearer conditions. Crizal Sapphire lenses with Scotchgard Protector are by far the best in durability.

Cleanability that Lasts the Life of the Lens

Wiping an ordinary lens creates a static charge which attracts dust. After wiping Crizal Sapphire lenses with Scotchgard Protector, no negative charges appear, dust is actually repelled and the lenses remain perfectly clean.

Enhanced Cleanability that Our Competitors Just Can’t Beat

Crizal Sapphire™ lenses with Scotchgard® Protector utilize Essilor’s proprietary High Surface Density™ (HSD) process to achieve the industry’s best cleanability with a contact angle of 116°.

Cleanability that Lasts the Life of the Lens

The HSD process densely packs the molecules on the Super-Hydrophobic Top Coat of the lens making it so slick, nothing sticks to it—not fingerprints, water or even smudges.
