## DEFINITY was the first progressive lens to:

- Leverage DualOptix™ digitally surfaced technology for the entire family
- Invent DUAL ADD®, to splitting the ADD power on both sides of the lens
- Innovate a 4th visual zone that delivers ground-level viewing without compromise

And building on these industry firsts, DEFINITY presents...

## THE NEW FAMILY OF DEFINITY DIGITAL LENSES

### NEW DEFINITY®<sup>3</sup> PLUS

- Incorporates 3 additional fitting parameters for a personalized fit: Panto, Wrap and Vertex
- Dynamic split of the ADD power between the front and back of the lens that's individually tailored to the patient's Rx to provide complete customization
- Better performance at all distances
- Optimized to frame choice with A, B, PD, & Seg Height fitting measurements
- Provides the lowest levels of astigmatism, especially at higher ADD powers
- Computer automatically selects between Regular and Short design

### NEW DEFINITY®<sup>3</sup>

- Dynamic split of the ADD power between the front and back of the lens that's individually tailored to the patient's Rx to provide complete customization
- Better performance at all distances
- Optimized to frame choice with A, B, PD, & Seg Height fitting measurements
- Provides the lowest levels of astigmatism, especially at higher ADD powers
- Computer automatically selects between Regular and Short design

### DEFINITY®<sup>2</sup>

- Fixed ADD split between the 2 sides of the lens: +0.75 on the back, remaining ADD power on the front
- Wide visual corridors with the lowest levels of astigmatism
- Provides low levels of astigmatism, especially at higher ADD powers
- 2 Designs: Regular and Short
