DEFINITY® Lenses Reading Card Hold at 16 in or 40 cm

Introducing the latest technological innovation from DEFINITY lenses

The newly designed back surface features a unique multi-design technology that provides wider vision across all zones (near, intermediate and distance)

- Improved design symmetry to see wider in the distance
- Superior alignment to see wider in the intermediate
- Dynamic inset variation to see wider in the near

DEFINITY +2.00 add

20/40 (Typical computer-sized type)	Presbyopia is an age-related condition that occurs when the eye's ability to change focus from far to near objects is compromised.	N12.5 .125
20/30 (Typical menu-sized type)	To help correct your vision from presbyopia, we have developed a unique progressive lens called DEFINITY.	N10 .32
20/25 (Typical dictionary-sized type)	DEFINITY lenses use a patented revolutionary design that uses both sides of the lens to correct your vision.	N8 .40
20/20 (Typical phone-book-sized type)	This design allows DEFINITY lenses to deliver the widest field of vision with the least amount of distortion at the outer edges of any progressive lens available.*	N6.3 .50
