

Quick Comparison Sheet

NEW VARILUX COMFORT®, NEW VARILUX COMFORT SHORT™ AND NEW VARILUX COMFORT ENHANCED™

New Varilux Comfort

“What is different about *New Varilux Comfort* compared to the Current Varilux Comfort?”

- New Varilux Comfort has all of the benefits of current Varilux Comfort plus three (3) main improvements:
 1. Up to 25% wider near and distance areas for relaxed vision in all daily activities
 2. A 1mm shorter progression length for easy access to the reading area
 3. Less astigmatism in the intermediate zone for even less swim and easier adaptation
- Additionally, there are two (2) key findings from our wearer’s test:
 1. New Varilux Comfort is preferred 3:1 over current Varilux Comfort **AND**
 2. 100% of current Varilux Comfort wearers adapted to New Varilux Comfort

New Varilux Comfort Short

“What are the main product benefits of New Varilux Comfort Short lenses and how does it compare to Varilux Ellipse®?”

- New Varilux Comfort Short lenses have all of the benefits of New Varilux Comfort created specifically for fitting heights of 14mm – 17mm
- Compared to Varilux Ellipse, New Varilux Comfort Short has three main advantages over Varilux Ellipse:
 1. 24% more distance area with a 141° distance angle
 2. 16% wider reading zone **AND**
 3. A shorter progression length

New Varilux Comfort Enhanced

“What makes New Varilux Comfort Enhanced lenses better than New Varilux Comfort lenses?”

- New Varilux Comfort Enhanced lenses are the most premium lens design in the Total Comfort Vision platform because they are customized through the DualOptics™ digital process.
- These lenses have all of the benefits of New Varilux Comfort lenses plus:
 1. They are wider in all visual zones
 2. Have less peripheral distortion for better side to side viewing **AND**
 3. Have a customized fitting height and can be ordered from 14mm and up
