

Newly Patented Free-Form Technology

SEIKO SURMOUNT™

The Thinnest Progressive Addition Lenses

For more information contact: Luzerne Optical Laboratories, LTD at
800-233-9637 or on the web at www.LuzerneOptical.com

Newly patented technology (No. 7,341,344) advancement for internal free-form design offers the highest optical performance in prescriptions with high spheres, cylinder and add powers.

- Up to 25% flatter in plus prescriptions
- Optimized automatic variable inset of reading area
- Advanced aspheric compensation factors in vertex distance, frame tilt and eye rotation to optimize the Rx for the as-worn position
- Multi-polar astigmatic correction improves panoramic vision and image stability, especially in prescriptions with high cylinder
- Available in 1.74, 1.67, 1.60 and Trivex®. Options include polarized Transitions® XTRActive™ and Transitions VI lenses (index varies)

Transitions® VI

Transitions® XTRActive™

Transitions and the swirl are registered trademarks and XTRActive is a trademark of Transitions Optical, Inc., Pinellas Park, FL 33782. Trivex® is a registered trademark of PPG Industries.
