VARILUX® PORTFOLIO – SUPERIOR VARILUX DESIGNS

VARILUX
Physio Enhanced™

D = progressive design
d = distance power

Varilux Physio Enhanced™: Provides W.A.V.E. Technology 2™ in a DualOptix™ digitally surfaced format. This customizes wavefront correction to anticipated viewing conditions for each wearer, providing greater control of wavefront distortions. The result is sharper vision at all distances and in all lighting conditions, even at night.

- **DS Precision & Accuracy:** Varilux quality processes are superior to other PAL designs due to Digital Surfacing Process Control (DSPC)
- **Simultaneous Control of Focus & Distortion:** DualOptix allows for control of distortion & focus levels not possible in a single surfaced PAL
- **Design Customization:** design is customized to the wearer's Rx
- **Customized Near Vision:** customized by Rx allowing the head and eyes to remain in a comfortable position while reading
- **W.A.V.E. Technology 2™:** customizes wavefront control to the patient's visual requirements

VARILUX
Physio DRX™

***Varilux Physio DRX™:** Provides W.A.V.E. Technology: Wavefront Advanced Vision Enhancement™ that identifies and reduces High Order Aberrations (HOA's) in the lens. The result is clearer, sharper vision at any distance, greater color contrast and wider fields of vision. The customized near vision delivers greater precision of both the Rx and the placement of the near zone resulting in a wider near visual zone.

- **DS Precision and Accuracy**
- **Customized Near Vision**
- **W.A.V.E Technology**

VARILUX
Physio®

***Varilux® Physio®:** Provides all of the benefits of New Varilux Comfort, plus W.A.V.E. Technology™, which identifies and helps reduce wavefront aberrations. The result is clearer, sharper vision any distance, greater color contrast and wider fields of vision.

- **W.A.V.E Technology**

NEW
VARILUX
Comfort Enhanced™

New Varilux Comfort Enhanced™: A DualOptix™ digitally surfaced lens format which customizes the design to reduce peripheral distortion and optimize the distribution of visual zones in the lens. The result is improved side to side vision with quicker adaptation and wider fields of vision in all zones.

- **DS Precision & Accuracy**
- **Simultaneous Control of Focus & Distortion**
- **Design Customization**
- **Customized Near Vision**

NEW
VARILUX
Comfort DRX™

***New Varilux Comfort DRX™:** A back side digital design that allows the wearer to use a natural head posture while reading with minimal peripheral distortion resulting in quick and easy adaptation. The customized near vision delivers greater precision of both the Rx and the placement of the near zone resulting in a wider near visual zone.

- **DS Precision & Accuracy**
- **Customized Near Vision**

NEW
VARILUX
Comfort®

***New Varilux Comfort®:** Allows the wearer to use a natural head posture while reading with minimal peripheral distortion throughout all visual zones, resulting in quick and easy adaptation.

*Also available in a short corridor version which redistributes visual zones to widen the distance viewing angle resulting in greater performance in smaller frames. Varilux Enhanced lenses are automatically customized for smaller frames based on fitting height.
