ASPHERIC CONTACT LENSES

Definition AC (6-pack)

Definition Everyday (30-pack)

Definition Everyday (90-pack)

- Base Curves: 8.6mm, 8.3mm / Diameter: 14.2mm
- Methafilcon, 55% WATER
- Power Range: +8.00 TO -12.00 (.50D steps above +4.00 and -6.00)
- Blue Handling Tint
- Convenient 6-packs for ease of disposability
- Improved Visual Acuity, especially in moderate to high prescriptions
- Enhanced contrast sensitivity
- Can correct astigmatism up to one diopter
- Superb comfort, easy handling
- Produced by the proprietary Continuflow™ molding process

NOT AN ORDINARY ASPHERIC LENS

DEFINITION^{AC}, unlike other aspheric lenses in the market, incorporates the ideal aspheric curvature for each soft lens power and thickness and compensates for aberrations caused by lens flexure on the eye.

Depending on the patient's prescription, this could result in improved visual acuity at all distances, as well as an increased depth of field, correction of some refractive astigmatism and improved contrast sensitivity, usually providing crisper, sharper and clearer vision.

Our DEFINITION^{AC} lens is an excellent choice for low astigmatics, early presbyopes, and those who wish to improve their overall vision.

Luzerne Optical is pleased to be your authorized distributor for DEFINITION^{AC} Soft Contacts. DEFINITION^{AC} Soft Contacts are not available through mail order, 1-800 companies or other alternative sources. DEFINITION^{AC} Soft Contacts are available right now for a great price. DEFINITION^{AC} lenses have a patented aberration control developed by Wayfront Technologies Research. DEFINITION^{AC} is FDA approved for up to 4 weeks of daily wear use.

LARGE INVENTORY IN STOCK FOR FAST DELIVERY!
