

You Asked For It. We Delivered!

Luzerne Optical is pleased to announce the release of

Polar365® Target Yellow

Brightening and Color Contrast Enhancement Year Round

- **Enhanced Contrast • Clarity •**
- **Brightening • Depth Perception •**
- **Blue Light Filtering •**
- **UV Protection • Polarization •**

Polar365 Target Yellow delivers brighter enhanced vision in cloudy, foggy, misty, rainy, dawn, dusk, snowy, or low light conditions where there is reduced visibility. Also excellent for low light indoor conditions or providing blue light filtering for screen use.

Polar365 Target Yellow adds clarity when judging distances or defining targets. They provide improved contrast by sharpening and helping to define edges and lines to help distinguish objects in their surroundings. They also aid when driving in foggy or low light conditions.

Great for outdoor & indoor activities and sports, such as:

Hunting - Competitive Shooting - Skiing - Cycling - Golf
Tennis - Racquetball - Snowboarding - Fishing

Available from Luzerne Optical in the following CR-39 lens styles
